SKILLS

Data Analytics & Visualization: Power BI, Microsoft Excel, Advanced Excel, Data Analysis, Data Analytics, Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Data Interpretation, Dashboard Development, MIS Reporting
Excel & Data Processing: Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Data Validation, Data Manipulation, Data Handling
SQL & Databases: SQL, MySQL, PostgreSQL, Data Extraction, Data Manipulation, Joins, Aggregations
Tools & DevOps: Git, GitHub, VS Code, Vercel, Render
Programming & Libraries: Python, Pandas, NumPy, Matplotlib

PROJECTS

Jarvis AI-Driven Task Automation Interface
Tools: Python, HTML5, CSS3, Javascript, Google Gemini AI

• Developed an AI-powered task automation interface using Python and Google Gemini AI, processing 10+ distinct voice commands for automated task execution.
• Integrated AI APIs and browser-based voice processing to convert user input into actionable commands, achieving sub-200ms response time for command execution.
• Reduced estimated user navigation time by 30% through hands-free interaction and automated command execution, demonstrating practical AI, automation, and problem-solving capabilities.

Superstore Sales Analysis Dashboard
Tools: Power BI, Excel

• Analyzed 1,000+ sales records across regions, categories, and customer segments to identify key sales, profit, and performance trends through EDA.
• Performed data cleansing, validation, and transformation to improve data quality and prepare datasets for accurate analysis and reporting.
• Developed an interactive Power BI dashboard with 5+ KPIs, 8+ visualizations, slicers, and filters, generating actionable insights for data-driven business decisions.

Financial Analytics & Real-Time Portfolio Dashboard
Tools: Python, FastAP, Alpha Vantage API , HTML5, CSS, Javascript, Vercel, Render

• Developed an end-to-end Python and FastAPI data analytics application, integrating REST APIs to process and normalize 100% of live financial data feeds.
• Implemented automated data processing with 30-second polling intervals, enabling continuous updates of KPIs and performance metrics.
• Configured automated client-side data polling every 30 seconds to maintain real-time synchronization, hosting the production microservices seamlessly across Render and Vercel.

EDUCATION

Presidency University, Bachelor of Technology (B.Tech) 08/2022 - 07/2026
CGPA: 7.38
Relevant Coursework: Computer Networking, Theory of Computation, AI-ML, Object Oriented Programming, Databases, Discrete Maths, Operating Systems, Computer Networks, Machine Learning, Information Retrieval, Software Engineering

St.Claret PU College, PU College 06/2020 - 05/2022
Percentage: 84%
Relevant Coursework: PCM (Physics, Chemistry, Maths) with Computer

CERTIFICATE

Programming Language in Java - NPTEL
Deloitte - Data Analytic Job Simulation
AI Fluency: Foundation and Framework
